

ANDRIY NOSOV

FRONTEND DEVELOPER

ABOUT ME

As a frontend developer, I have a degree in computer engineering and experience with a stack of technologies, including JavaScript, HTML, CSS, TypeScript, React, Next.js, Redux, Rest API, and others. I have over a year of experience working on commercial projects, both individually and in a team. You can check all of the projects in my portfolio website.

I have good self-learning skills, thanks to which I was able to learn a lot of necessary technologies and use them effectively in my projects.

My English level is Intermediate, I have good communication skills, which I acquired from a previous job where I worked on a large team and communicated with many clients.

Also, I worked with export documents, which allowed the company to increase its sales and enter the world market. So I can add responsibility and attentiveness to my strong point.

Art vs War

DESCRIPTION: The "Art vs War" gallery platform is designed to facilitate the sale of paintings, with a focus on merging art and charity. The platform offers possibilities where artists can sell their paintings. Key features of the project include user registration, artist profiles for uploading and editing paintings, and secure sales transactions. This project is based on Next.js and Spring Boot frameworks, utilizing Amazon Web Services and Stripe payment service. Our team consists of a PM, frontend and backend developers, QA, and a UI/UX designer.

TOOLS : Next.js, TypeScript, HTML, SCSS, Redux, Axios, AWS Amplify, AWS Cognito, Cloudinary, Stripe, React-hook-form.
