HARD SKILLS

- Javascript, TypeScript, HTML, CSS
- React, NextJS
- SCSS, Tailwind, Bootstrap, MUI
- NPM, Babel, Redux, Rest API
- Git, Github, VSCode, Chrome Dev Tools, Vercel
- Figma, Jira, SEO, UX/UI
- **English — Intermediate (B1)**

In my recent commercial projects, I preferred **NextJS**. This framework has integrated Image Optimization, handy Routing, and SSR which improves performance and SEO. Also, I applied **TypeScript, Tailwind, Redux toolkit, and Axios**. I implemented the ability to receive order data in the Telegram bot, integrated the Facebook chat and Google Analytics service.

Frontend development

- Learned the fundamental stack of front-end technologies;
- Practiced workflow: working with Git and GitHub in a team, solving tasks and debugging, deploying web pages to a server;
- Implemented a lot of projects that are based on the latest technological stack: TypeScript, React, Redux.

ABOUT ME

As a frontend developer, I have a **master's degree in computer engineering** and experience with a stack of technologies, including **HTML, CSS, JavaScript, TypeScript, React, Redux, Rest API and others**. Now I continue to self-study and learn the backend stack.

My English level is Intermediate. I have good communication skills, which I acquired from a previous job where I worked on a large team and communicate with many clients.

I have good self-learning skills, for example, I have set up export possibilities in the company, without having any skills in this area.

I also worked on export documents, which allowed the company to increase its sales and enter the world market. So I can add responsibility and attentiveness to my strong point.
