- English — B1 (Intermediate)
- Unkrainian — Native

ABOUT ME

As a frontend developer, I have **a degree in computer engineering** and experience with a stack of technologies, including **JavaScript, HTML, CSS, TypeScript, React, NextJS, Redux, Rest API and others.** Currently, I've implemented several commercial projects, such as a website for a logistics company, web-store for a confectioner and a art gallery platform.

My English level is Intermediate. I have good communication skills, which I acquired from a previous job where I worked on a large team and communicate with many clients.

I have good self-learning skills, for example, I have set up export possibilities in the company, without having skills in this area.

I also worked on export documents, which allowed the company to increase its sales and enter the world market. So I can add responsibility and attentiveness to my strong point.

PROFESSIONAL EXPERIENCE

2022 - 2023 COMMERCIAL PROJECTS

Buy Art Help Ukraine — artvswar.gallery

TOOLS : Next.js, TypeScript, HTML, SCSS, Redux, Axios, Stripe, AWS Amplify, AWS Cognito, Cloudinary, React-hook-form, Swiper.

DESCRIPTION: The "Art vs War" gallery platform is designed to facilitate the sale of paintings, with a focus on merging art and charity. The platform offers possibilities where artists can sell their arts. Key features of the project include user registration, artist profiles for uploading and editing paintings, and secure sales transactions. This project is based on Next.js and Spring Boot frameworks, utilizing Amazon Web Services and Stripe payment service. Our team consists of a PM, frontend and backend developers, QA, and a UI/UX designer.

CheeseCakes store — nahirna-cake.com.ua

TOOLS : Next.js, TypeScript, HTML, Tailwind CSS, Redux, Axios, Swiper, Vercel, Google Analytics, Telegram bot.

DESCRIPTION: E-commerce store with a mobile-first orientation design, build on Next.js. Implemented the ability to receive order data in the Telegram bot and integrated the Google Analytics service.

Ukrainets company — ukrainets.in.ua

TOOLS : Next.js, HTML, SCSS, Swiper, Facebook chat.

DESCRIPTION: An information website for a logistic company with a user-friendly responsive design. Customers have the ability to request a callback, communicate through Facebook chat, and the owner can receive information about customers' orders by e-mail.

2013 - 2021 — Sales Manager (SE Chortkivskyi KHP)

- Implemented the export functionality abroad, which allowed exporting products to the world market;
- Prepared export documents and delivered about 10 thousand tons of goods.

2010 - 2012 — Hardware Sales Manager (Tetra Consulting)

- Bought and sold computer hardware and other related equipment.
- Worked with product vendors. Signed cooperative agreements with new suppliers and expanded the dealer network;

2008 - 2010 — Computer Repair Technician (Tetra Consulting)

- Repaired computer hardware, built and configured PCs.
